

I wanted to take a few moments to tell you how important the radio station K-Love is to me and I believe the community as a whole. There is so much bad news and negative programing on the airwaves that it is at times, difficult to have a good disposition and even a sense of hope. I believe to have something positive and uplifting can truly help people have a better outlook on their individual situations and help give them the strength to handle just about anything. I am not sure if it was the FCC that took the radio station 106.7 The Fish off the air, but I beg you not to take this station off the air. We need something positive that our children can listen too without embarrassment or censoring. The recording artists that are heard on K-Love are young and a good influence on our young people. I'm sure you have heard a lot of Christians say....all forms of worship have been taken away from our children...prayer in school, anything that mentions God (The Pledge), prayer at sporting events, PTA Meetings, even any public signs for our communities that would have an image of a church. Please, do not let any negative influences deter you from continuing to broadcast fine programs such as K-Love. Thank you for your time and consideration.
